MEDIA RELEASE

Arapahoe County 2014 Hazard Mitigation Plan

Arapahoe County is in the process of updating its 2010 Hazard Mitigation Plan. This planning project involves identifying local mitigation actions that can be taken over the long term to reduce risk and future losses from disasters. The detailed plan assesses a variety of potential natural hazards that could affect some or all of the county's residents and businesses. Throughout the planning process, the county looks forward to engaging the public and obtaining input. Arapahoe County is committed to reducing the vulnerability of its citizens to the effects of natural hazards and this Hazard Mitigation Plan is an important tool in helping to do so.

In order to inform and engage Arapahoe County residents and other local and regional stakeholders in the planning process, the county has developed a project website for the Hazard Mitigation Plan update. Residents and community members can learn more about hazard mitigation in Arapahoe County by visiting:

www.tinyurl.com/2014HMP

This website includes an online hazard awareness survey, and will include sections of the Draft Plan as they become available. The public is encouraged to visit the site, take the online survey, review the Draft Plan sections as they are posted, and provide input throughout the planning process. Instructions for signing up for email alerts concerning the project can also be found on the site.
