Text to 911 Information

On May 15, 2014, the four major wireless carriers (AT&T, Sprint, T-Mobile and Verizon) made text to 911 available to their customers to use in areas where the 911 center is able to receive them. Texting to 911 has some very positive benefits, such as allowing the deaf and hard of hearing communities to communicate with 911 directly without a relay service or TTY/TDD device. The Arapahoe County Sheriff's Office (ACSO) is currently unable to receive texts to 911, but is in the process of completing equipment updates to receive texts.

Here are some things you should know as ACSO prepares to receive your texts:

- If you can safely make a voice call to 911, please do that rather than texting. ACSO receives more information regarding your location and can gather pertinent information more quickly by talking directly to you.
- If you text 911 before the system is ready, you will receive an automatically generated "bounce-back" reply advising you that you need to contact 911 by voice call or other means.
- The 911 center will not charge you to text ACSO, but your service provider may. Make sure you know what your wireless plan includes as it pertains to texting and data usage.
- Whether you text or call, *911 is an emergency number*. Make sure to use this for emergencies only and not as a toy. Very similar to 911 receiving a prank voice call, prank texting is a serious problem and will tie up a 911 line and a dispatcher. This will take that 911 line and dispatcher away from someone who may need emergency services. Only call or text 911 when you have an emergency!
