Residential New Construction - Accessory Structure	Will be digging a trench for the foundation as per the foundation drawings and then will have a concrete contractor help with placing the rebar, anchor bolts, and wire mesh and then pour the concrete for the footings and floor. Will have a building erector contractor help to put up the building as per the building drawings. They will also install the gutters with downspouts, overhang door and jackshaft door opener, and side entry door as per the building drawings and manufacturers installation instructions for those items. Once the side entry door is installed I will be placing stepping stones on the outside by the door. The pad will be 3' x 3'. Will dig a trench from the house power box to the new building, the trench will be 24" deep and the feeder cable is 6/3 direct burial cable. At the house box and building will run a 2" conduit from the box to the trench and will extend it about 18" in the trench. The power box will be supported by a unistrut frame that will be built and anchored to the floor. Will run a circuit using Romex 12/2 through the flex conduit to the Jackshaft door opener and connect it as per instructions from manufacturer. Will install three lights (LED) and an outlet that will be installed on the unistrut frame.
