Arapahoe County is wrapping up construction on the Quincy Avenue and Gun Club Road intersection. Construction began in October of 2019 and is scheduled to be completed this July. The intersection will be fully functional in its new configuration on June 21.

### Details

The new intersection is called a Partial Continuous Flow Intersection (PCFI) and is a modern and efficient approach to reducing delays and travel time.

As shown in the map, traffic will soon be able to enter a left turn lane about a quarter mile away to continuously flow and bypass the intersection.

Separating the left turn lane reduces wait times and allows more drivers to pass through the intersection during each green light. Similarly, bypass right turn lanes were added in all directions, allowing drivers to merge with flowing traffic without stopping at a light.

Additionally, the E-470 ramps were relocated to help distribute traffic and ease congestion at the intersection.
