Iliff Avenue Corridor Improvement Project progresses as crews remove existing roadway for future widening

ARAPAHOE COUNTY — Iliff Avenue corridor improvements progress as Arapahoe County Public Works, along with contractor partner Concrete Express Inc., continue existing roadway, median and sidewalk removals, between South Parker Road (CO 83) and Yosemite Street. To safely remove the existing median to open the roadway for future widening, crews will conduct daytime single lane closures.

TRAVEL IMPACTS FOR THE WEEK OF OCT. 4 THROUGH OCT. 8:

- 8:30 a.m. through 3:30 p.m., Monday, Oct. 4, through Friday, Oct. 8:
 - Daytime left lane closures on westbound Iliff Avenue from Parker Road (CO 83) to Yosemite Street
 - Daytime left lane closures on eastbound Iliff Avenue from Yosemite Street to Parker Road (CO 83)
 - Daytime right lane closures on westbound Iliff Avenue from Emporia Street to Dayton Way

All work is weather-dependent and subject to change.

Other third-party utility work is also being completed in the area, unaffiliated with this project.

In the future, travelers can expect daytime and nighttime traffic impacts. Intermittent daytime and nighttime lane closures should be expected. Minor impacts to bicycle and pedestrian access will be required. Access to transit stops will be maintained throughout construction.
